

# Cloud-based Learning Management System

SIMPLIFIED FOR ORGANIZATIONS

# OVERVIEW

## About EduPrez.com

EduPrez.com is a versatile, powerful, yet simple cloud-based learning management solution for organizations to deploy their own e-learning platform. It allows organization to create their own courses and to teach their students / employees seamlessly.

Powered by PrezCapture™ Learning Management System (LMS) technology, EduPrez LMS provides a low cost, e-learning platform for all kinds of organizations worldwide, small and big. Simplified and easy to use, it is as effective as the most expensive solution providers, but more affordable and more intuitive to use.

## Key Features

- **Start Immediately**  
Teaching has never been easier with an effortless and rapid deployment of EduPrez's platform without the need for IT resources. With affordable pricing, you can quickly implement solid e-learning solutions without breaking the bank.
- **Custom Branding**  
Your LMS reflects your brand, so it has to look good! Configure the look and feel of the LMS to reflect your own branding.
- **User Friendly Teaching/Learning Experience**  
Via a mobile friendly platform and instructor-led teaching, students can choose what courses they want to enroll, interact with instructors, track their learning progress and review past lessons any number of times. Participate in forum discussions, polling and Q&A's.
- **Course Management**  
Easily set course prerequisites, categorize course based on topics, add lessons (videos, documents and YouTube links), create quizzes and assign e-certificate upon course completion. Finally review and publish courses. And you decide who needs to watch what and when.

# OVERVIEW (2)

## Key Features (continued)

- **User Management**  
Manage unlimited users. Group users based on classrooms (year of study, department, job function, etc), approve each user with instructor or learner access using role-based permissions.
- **Administrative Functionality**  
Review and publish courses created by instructors. Create categories for courses and classrooms for users. Retrieve real-time reports on course progress and instructors'/learners' performances with the click of a button! You know who's taken the course, who's not along with other various customized analytics to suit your needs.

## Benefits

- **For Organizations**
  - **Cost savings:** No hardware or software purchases required
  - **Increases productivity** via cloud-based teaching and sharing
  - **Control / Security:** Role based architecture provides security of valuable data and crucial information at all levels of users. You decide who needs to watch what and when
  - Easily create **courses** with **certificates**
  - **Complete analytics:** Measure responses and effectiveness of courses, track participation and evaluate learners
  - Suitable for **remote learning**, thus reducing carbon footprint
  - **Earn revenue** by selling your courses online
- **For Learners**
  - **Learn** at your own pace efficiently and conveniently
  - **Earn grades** via self assessment
  - **Save money** via e-learning
  - **Review** past lectures any number of times
  - **Rate** the course and the instructor
  - **Participate** in forum discussions with fellow learners and instructors
